

Patient safety first

IRIS making medicine dispensing safer
Best in class high speed pouch checking

 **IRIS**^{G2}

ZIUS.

Identifying errors

Photo evidence

Accurate error finding

IRIS secures the dispensing process

Most accurate error finding
ZiuZ IRIS uses advanced visual intelligence technology. Using various parameters, ZiuZ IRIS meticulously analyses the contents of each medication pouch. Any errors are quickly identified on screen through color coding.

Effective and Efficient
ZiuZ IRIS approves up to 98% of the pouches automatically, leaving very few pouches to be checked on the screen. The colour-coding and workflow guidance in the intuitive interface leads the pharmacist to those few mistakes accurately.

Detailed evidence of packaging
ZiuZ IRIS takes a photo of each medication pouch. These photos are saved in a central storage, so that they can be easily retrieved if necessary.

Plug and Play
ZiuZ IRIS is installed, implemented and taken into production in no time. The reference image database is easily built straight from the beginning, straight from production pouches.

Multiple interfaces
ZiuZ IRIS interfaces to most popular brands of pouch packaging machines.

Unparalleled quality for making medicine dispensing safer

Correcting pouches made easy

Close the loop of the pouch inspection process by adding a Corrector to IRIS. Collecting evidence of corrected pouches is fast and easy with the Corrector. Its top-class camera captures the corrected pouch in a perfect photo. The single-click confirmation mechanism takes the user through the correction process without using the mouse. Correction can be done from any location in the pharmacy using the IRIS Studio multi-user license.

The IRIS Studio software provides a simple and easy to use workflow for correcting pouches. Details on what medication to correct and in which pouch is within direct reach of the user from the integrated correction tab. A simple pouch correction wizard helps the user to take the right photo.

IRIS supports multiple users working together

Install IRIS Studio anywhere and work simultaneously with up to 5 concurrent users. With a multi-user license, users can work together viewing and correcting pouches while processing a new batch with IRIS. Create batch reports from office PC's without the need to sit next to the machine. Organizing the placement of IRIS becomes flexible as only processing of the batch is done on IRIS itself, correcting and viewing can be done anywhere else in the pharmacy.

ZiuZ IRIS overview

- Full color analyses of medication
- Error pinpointing through clear color coding and icons
- Automatic approval rate up to 98%
- Intuitive user interface (extremely short learning curve)
- Automatic analysis helps the pharmacist to optimize their system
- Easy retrieval of all data and pictures from the archive
- Built-in quality log
- Interfaces to most brands of pouch packaging machines
- Covers production of at least one dispensing machine (up to 5.000 pouches per hour)

Dimensions

Height:	43 cm
Width:	65 cm
Depth:	38 cm
Weight:	28kg / 62 lbs
IRIS + Reel:	117 cm

ZiuZ Medical

ZiuZ has built a long and successful experience with the Inspector and Photon high volume pouch checking devices. ZiuZ Medical operates independently of drug dispenser machine manufacturers and can interface with all main dispenser machine brands. The production of millions of medication pouches are checked by ZiuZ Medical inspection devices on a daily basis.

ZiuZ Medical is a knowledge-intensive company specialized in developing cutting-edge visual intelligence technology for pharmaceutical and medical purposes. It is driven by a determination to make a difference in medical challenges. The company has a pragmatic and no-nonsense approach; an approach that encourages successful collaboration with partners and customers.

Our Mission: Achieve a worldwide impact with profitable and innovative solutions, based on visual intelligence, that deliver a contribution to solving social relevant problems in the medical world.
