ANALYTICS

Helps you improve efficiency and save costs

Tap into the full potential of your inspection process

You are performing well, but you want to achieve excellence.

Striving for the perfect process
In order to maximize patient safety, you strive for perfection in your packaging process. You make continuous improvements, act on incidents and make your production as efficient as possible while also being cost-effective.

Put your data to work
While inspecting your daily production, your inspection device collects valuable information, such as:

- ✓ True Alarm rate
- ✓ Number of corrections
- ✓ Pouches per device
- ✓ Pouches per day
- ✓ Crumb errors
- ✓ False Alarm rate

Benefit from years of knowledge and experience
ZiuZ Analytics lets you benefit from years of knowledge and experience in high-end pharmacy automation, gained by ZiuZ and pharmacies all over the world. It will help you in making data-driven decisions and set ambitious and realistic goals. It will even enable you to compare your production process to other pharmacies by means of benchmarking.

Are today's results better or worse than yesterday's? Is there a trend? What is the cause of this? Do you have to act?

ZiuZ Analytics helps you to put this data to work. You can monitor and benchmark current production and gain detailed insight into the packaging and inspection process.

ZIUZ.

Get in control

ZiuZ Analytics provides you with tooling to fully control the most important KPIs. Enabling you to monitor the health of the live production and make drill-down analyses.

For example, the True Alarm dashboard shows the reasons why specific pouches and medication have failed. It makes you focus on the most important things to improve. Like, all the medication that cause crumb errors and which medicine is the biggest contributor to a certain error. It also generates an overview of medications that perform subpar. ZiuZ Analytics even gives the first indication of how to solve problems.

Save costs

Lowering your false and true alarm rates even by respectively 1% and 0,1% easily translates to saving thousands of euros on a yearly basis.

Do I have to act now?

Medication that performs subpar

Biggest contributor to certain error

Crumb errors

Take your production and patient safety to the next level with ZiuZ Analytics!
